## WHAT WE DO?

Our mission is to provide innovative, reliable, and cost-effective software solutions that drive your success. Your vision is our priority, and together, we can turn it into reality.

### You are just like our typical clients if:

You have a new world changing idea and need a reliable, affordable long term partner to bring your idea to life.

You already have a team, and want to grow that to meet your business growth. You need a trustable tech partner that could work seamlessly with your team and deliver your business goals.

You want small portions of your product developed as separate small modules to keep the costs low or reduce the risks.

You have talented engineering team but you want trustable, certified managers to provide technical direction.

You have a software product and you want to test it thoroughly before rolling out to production. You don't want your clients facing bugs.

You want to automate your dev, QA, Deployment cycles and make sure that your technical operations are top notch.

## Some of the “symptoms” we might be able to successfully relieve:

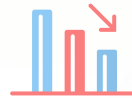

Troubled Projects delivered by inexperienced outsourcing partners, putting your time and costs under risk. Or too much fire fighting causing your time and investment to go haywire.

This Technology stuff is too “Nerdy”. The business owner’s focus should not be on learning a whole new language. It should be how to grow his business.

Keeping an Inhouse Development team is too much of a hassle. Project Management, HR, Payroll, Benefits, Taxes, Govt Policies, Related Hardware and Infrastructure, Running cost of the team. Recruitment, onboarding and keeping to your commitments if a resource leaves the team.

Project delivered but too much fire fighting, causing your customers to leave you.

Over the years, we have successfully helped numerous clients, fostering enduring and long-term partnerships.

## HOW DO WE HELP OUR CLIENTS?

We believe in strong collaboration and communication during the entire project life-cycle, for ensuring success.

### Resource Augmentation

Our staff augmentation model is intended to help companies find the right skills for their project.

### Dedicated Teams

Our team of dedicated Engineers is highly qualified and dedicated to deliver quality development, testing, devops and management services to clients.

### Comprehensive Development

This engagement model is designed to help our clients from inception to completion of a project idea. We handle ALL aspects of the development be it Requirements Engineering, Planning, Execution, Development, Testing, Deployment and Support.

### Fixed Gigs

Hire project based developers to minimize the cost and set fixed budget for the entire project with clearly defined deliverables and hassle-free working.

# CLIENT TESTIMONIALS

"We have enjoyed working with HazelSoft for years and intend to continue working together as our company grows."

**Orly Rietkop**  
Managing Partner – 9Fold

Everything from project communication, requirements review, solution architecture proposed by Hazelsoft, to code reviews and collaboration from the team was a refreshing experience. Hazelsoft delivered on time, and included features that we didn't think could make our launch timing.

**Kawal Singh**  
Vice President Of Technology - FCB/SIX

"Thank you Hazelsoft team! You have been an incredible support. Very committed team, technically very sound and client centric. Highly recommended."

**Prachi Shukla Dixit**  
Co-founder - Maya and Mosh - Language and Culture Learning

"We have worked with HazelSoft for year on several projects including custom mobile apps and web base admin tools. The Team at HazelSoft has always been professional and very responsive to our needs...."

**Aaron Culver**  
CFO – Eat The Frog Fitness

"These guys literally "own" your project as if it were theirs. The team is very good at understanding requirement, and thanks to their wide range of experience, they come up with high quality work, within budget...."

**Chamesou Toure**  
General Manager-Caurix Paiement Mobile

# OUR BEST PROJECTS

## 1. ShutterB

ShutterB is igniting a community of smartphone camera enthusiasts and creators available for hire to capture events. Bringing smartphone creators together to inspire, teach, and share amongst each other how to offer our skills to event hosts so they can stay focused. The platform connects event hosts and shutterB photographers where they can manage their entire booking including selecting shutterB photographers that suit their style best, payment transaction, and same day content delivery.

## 2. Full Rail

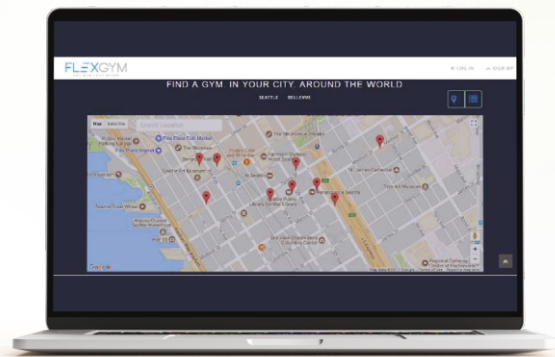

Full Rail is designed to drive repeat business and increase online ordering frequency by re-engaging the customers with custom designed, fully automated email and text marketing campaigns.

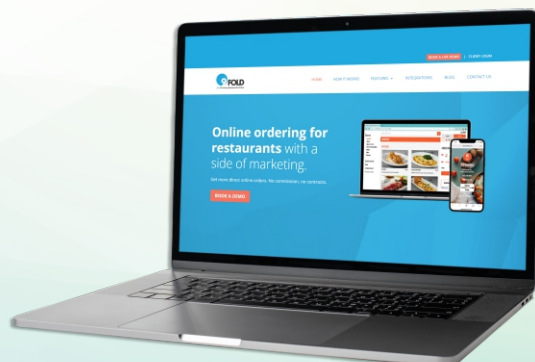

### 3. FlexGym

Flex gym is a web/mobile app created around the idea that a user can go to any gym registered with the platform by paying a little amount per sessions instead of paying for a monthly subscription. The platform is capable of suggesting it's users, gyms around his location based on user's preferences.

### 4. 9Fold.me

9Fold.me is an online restaurant ordering platform with 600+ restaurants currently running on it. It can create menus and take delivery/pickup orders for any registered restaurant. It can also perform billing and reporting for these restaurants. We also have mobile apps that are integrated with the CMS and billing server.

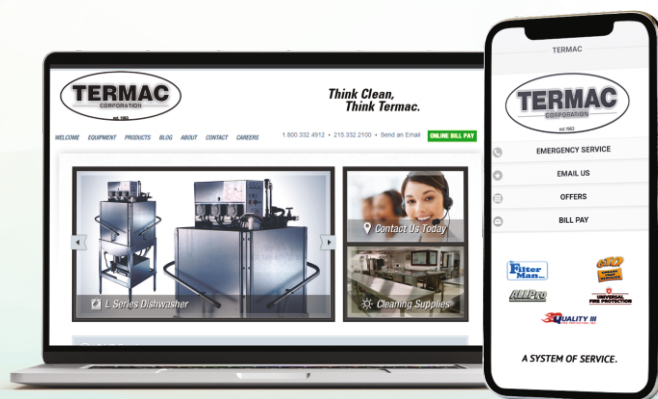

## 5. CAURIX Mobile Payment Solution

Caurix is a web and mobile electronic money payment solution. It is a collection of multiple apps communicating with each other over a payment platform. Caurix multiple apps are used by different types of users like money distributors, merchants, service providers or simple consumers.

## 6. Termac

Termac corporation is a web and mobile app, providing commercial dishwashing machines and industrial cleaning supplies to people in Pennsylvania, Delaware and New Jersey since 1963.

OUR TEAM

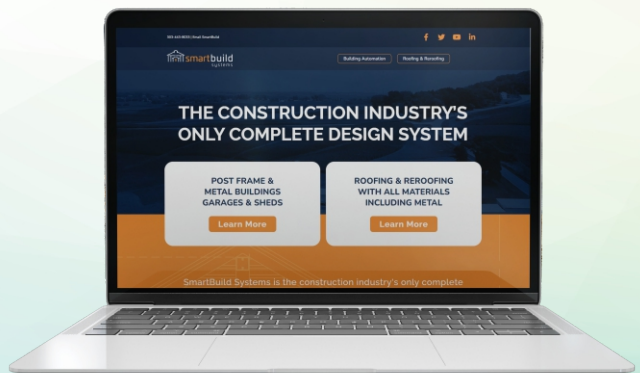

## 7. Maya and Mosha

A fun, interactive and gamified learning app that aims to inculcate a sense of pride and helps in connecting our kids with their roots, culture and mother tongue.

## 8. Smart Build Systems

SmartBuild Systems is the construction industry's only complete design system for pole barn and metal buildings, roofing and reroofing. Simple enough for anyone to use, this web-based software quickly generates a 3D model, material lists, pricing, proposals, and construction documents for almost any post frame building, metal structure, or roof.
